SAP ABAP Training

admin · Sunday, July 26th, 2009

ABAP is one of the many application-specific fourth-generation languages (4GLs) first developed in the 1980s. It was originally the report language for SAP R/2, a platform that enabled large corporations to build mainframe business applications for materials management and financial and management accounting.

SAP Overview

- ERP Overview
- Different Modules In SAP
- Architecture
- Database Layer
